

# The Squirrel Project

## WHAT DO THEY DO ?

The Squirrel Project is a french punk rock band from Clermont-Ferrand composed of 4 nutcases (easy, right ?). Well they basically enjoy playing music in a garage while acting like dumb asses most of the time. The crazy thing in it, is that it doesn't sound so bad, you might even have fun yourself ! They are barely grown up, not really mature and stuff but still their texts deal with life experiences -among other stuff-, that unfortunately aren't always easy to get over. The aim is to deal with it with hindsight and fun, knowing everything sounds better when it brings people together. That's why songs are energetic and positive, and will certainly remind you of your uni years, with the backpack, maybe skateboard and surely beers. If that sounds good to you, just grab them all back, come as you are and let's enjoy the moment.

## WHO ARE THEY ?

The band is young - yes, which doesn't mean they are not familiar with the live already. **Antoine** (guitar/vocals and band leader), is also part of Breaking Strain (punk-rock band) as a drummer, as well as he was in acidSpike (power-pop from 2001 to 2008). **Rémy** (guitar), entirely self-taught, who started playing the guitar in 2001, is having his first band experience, and turned out to be quickly at ease on stage. **Jimmy** (drum/back vocals) who has been into music since a very early age, has played the drum and all kind of percussions for 15 years now. Finally, **Antoine** (bass/back vocals) is also Foolish's bassist (punk-rock/ska-punk band), on tour since 2008 with their first album "Back On Track" just out.

From left to right : Jimmy (drums/back voc.) - Antoine (top, bass/back voc.)  
Rémy (bottom, guitar) - Antoine (guitar/vocals)

## HOW DOES IT REALLY SOUND LIKE ?

Their first EP is available, just ask. It is composed of 4 titles, including an unplugged version, the whole allowing you to build your own opinion about the band pretty quickly. You can also just listen freely to the titles on their website, as well as on their Myspace, Facebook and PureVolume profiles.
